

Dear folks,

I don't understand why anyone would want to "mess" with the channels on satellite radio. We need more stations, not less. I am a REALTOR, and am in my car ALL THE TIME. While I certainly enjoy all the commercial free music, I need the traffic and weather to keep me up to date, to help me with service to my clients. I personally think that satellite radio is fantastic. I live in a small town, and the radio choices here are very limited, as are the services and points of view they offer. With my satellite radio I can reach the entire country. I'm paying for this service, and it's well worth the money. I now use my radio again. I even bought a system for my home, I enjoyed the service in my car so much! More than my CD changer. Don't reduce what I paid for! Leave free enterprise alone, thank you.
